# Criteria IV - Infrastructure & Learning Resources

4.2.1: Library is automated with digital facilities using Integrated Library Management System (ILMS), adequate subscriptions to e-resources and journals are made. The library is optimally used by the faculty and students

Integrated Library Management System

➢ Federated search is an information retrieval technology that allows the simultaneous search of multiple searchable resources. This allows a user to search multiple databases at once in real time. The library has Online Public Access Catalogue, which is available on computer terminals in library; users can search documents by author, title and Related Topics.

➢ The Profile of the library is in the college website.

➢ Library Automation Activities: -

- Library is completely automated.

- All the Library housekeeping operations have been computerized.

- All the books are being Bar-coded.

- Library users are issued with a bar-coded ID card.

- Library is also using the Bar-code technology at the Circulation desk for issue and return transactions.

- All computers are connected through Local area Network (LAN).

➢ 1Gbps OFC provides fast internet service.

➢ Resource sharing network/Consortia like INFLIBNET facility is available.
